

Improve the Value Proposition of the PMO/Program/Project Management in Your Business

Are you satisfied with the results from your business using project management?

Is your internal business culture suffering from “too much work”?

Does the workforce work the right order of work every day?

Does project change control improve project delivery success?

Are you achieving 95% project delivery success or better from project management each year?

If you answer no to any of these questions, we encourage you to take action today and learn more of how your business can truly benefit from the value proposition of project management – helping to grow the business.

We offer world class project management assessment services designed to meet most any assessment need in your project management practice including the following services:

PM Assessment Lite - This service is designed to focus on specific areas and provide immediate information and guidance on next steps to bring the project and resource investments back on track.

PM Assessment – This service is a full project environment assessment of your organization. The assessment process includes interviews and survey application. An Assessment Findings and Recommendations Report is produced that outlines specific areas for improvement and how to go forward.

PMO Assessment Lite – The PMO entity is bringing high value to businesses everywhere today. If you have a specific PMO that needs a tune-up to achieve more value to the business,

this service will perform the analysis and make the recommendations to identify how to gain more benefit for the organization.

PMO Assessment - This is a full service evaluation for the project management delivery environment. We recommend this service if your project management business practice is underperforming.

PM Tool Selection Assessment – We know project management value. We know project management science and we know what organizations need from project management to successfully deliver projects today. This service will perform or assist in project management tool selection.

Program/Project Rescue and Recovery Assessment – If you have program or project investments that are failing today and the risk is high that unless corrective action is taken soon, failure is certain, you need our Rescue service to bring this investment back on track. We guarantee our recovery recommendations and your satisfaction or your money back...100%.

Full Enterprise Project Management Root Cause Analysis and Strategic Solution Development - Have Kendall and Rollins on site, directing a 3 month comprehensive analysis of your project flow. In the root cause analysis, you will determine why less than 95% of your projects are delivered late, over budget or out of scope. Determine why projects take so long to complete. Determine what is stopping you from doing more projects per year. In the Solution Development, you will have a comprehensive strategy and road map to completing projects at least 25% faster, executing at least 25% more projects per year, and having at least 95% of all projects complete on time, on budget, within scope according to original commitments!
